

Advanced Hosted Telephony

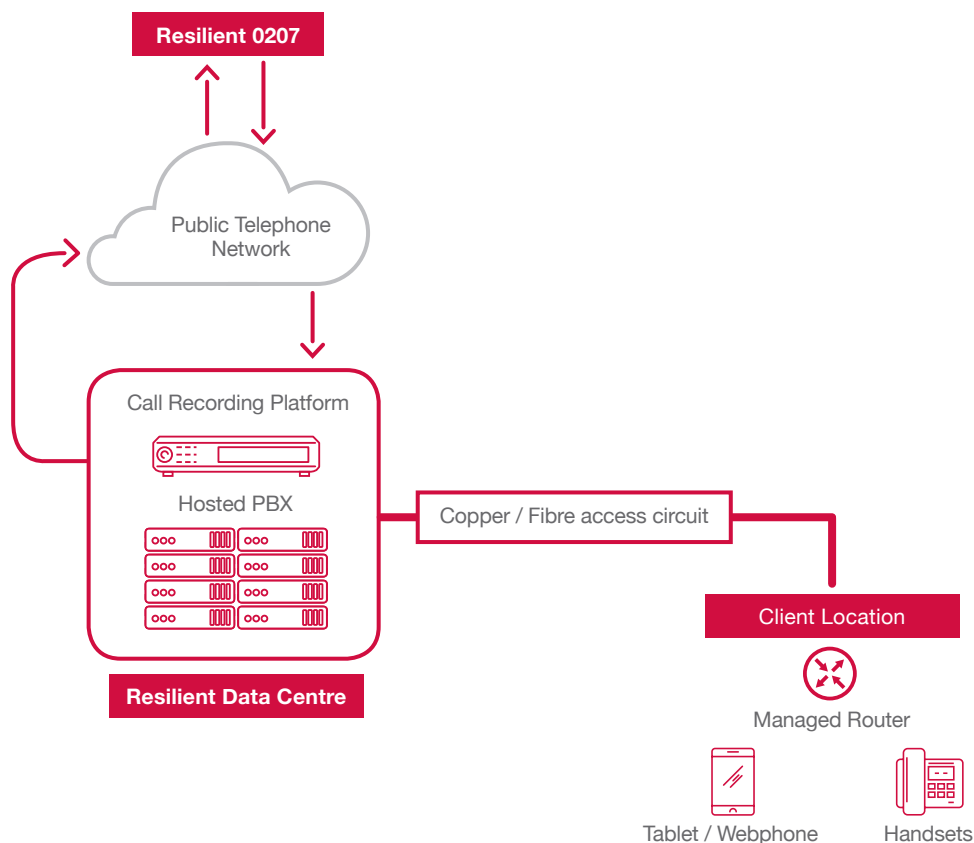

Flexible, cost effective, secure

The Adam Phones Hosted Telephony solution delivers an enterprise suite of features along with enhanced geographical resilience and a host of powerful integrations with other services.

For FCA regulated businesses, our Hosted Telephony solution offers call recording for compliance (which includes immutable storage for up to 7 years). Customers can also benefit from integrating mobile call recording to their compliance technology suite, along with cloud based trade reconstruction for unmatched visibility of trading practices.

A range of HD voice handsets, webphone and conference devices are available, along with advanced Salesforce integration if required.

Hosted Telephony from Adam Phones is rich in features yet affordable, including the facility to provide local numbers in 74 countries. It delivers a comprehensive set of enhanced capabilities for hosted voice, with excellent call quality, rapid implementation lead times, low capital expenditure and minimal operational expenses.
