

IBM MaaS360 Unified Endpoint Management

First class enterprise mobile estate management

Mobile moves fast and is rapidly transforming how organisations do business and how people work. Finding effective ways to harness the power of mobile to enable productivity, while keeping corporate data secure and compliant, all whilst providing the best user experience, presents complex challenges for enterprise IT and security teams.

Unified Endpoint Management services simplify the management of your mobile estate, with a comprehensive platform for all your mobile assets, from smartphones to tablets and laptops, including personal and corporate owned devices.

IBM MaaS360 is a class leading, fully managed UEM service from Adam Phones that provides a wide range of management and security options across different categories of users, devices, content and apps, all within the context of their business. This offers the flexibility to implement tiered or layered mobile security to address varied end user needs and IT security requirements including both corporate owned or BYOD strategies.

To help us identify your needs, we can provide a free trial for a test user base before providing recommendations around deployment architecture, policies, compliance rules and license requirements. Your chosen solution should immediately offer your user base enhanced productivity without disruption, so a clearly defined implementation to your business is essential.

Adam Phones will offer an on-site presence, where required, and support with portal management around policies and compliance settings. We can offer both help-desk end user training to ensure a successful business wide deployment, as well as access to named account management from our award winning customer services team.

From a single platform, our fully managed Endpoint Management services allow you to:

- ✓ Configure and secure devices
- ✓ Automate compliance rules
- ✓ Initiate enrollment requests
- ✓ Distribute apps and documents
- ✓ Detect and remediate malware
- ✓ Contain corporate data
- ✓ Remote wipe compromised devices
- ✓ Integrate with existing infrastructure
